

## Steps to ensure Internet Banking Website is secured with Valid SSL Certificate\*

<b>For Internet Explorer 8</b>	
<p>1. The Website address (URL) should start with https:// NOT http://</p> <p>i.e. <b>https://www.psbonline.co.in/</b></p> <p>The letter 's' in https:// stands for secure.</p>	 <p>The screenshot shows the top of an Internet Explorer 8 window. The title bar reads 'Detail Signon Page - Windows Internet Explorer'. The address bar contains the URL 'https://www.psbonline.co.in/BankAwayRetail/(S(jpugj451v4pj1nveq0lit55))'. A red box highlights the 'https' part of the URL.</p>
<p>2. Security Pad Lock icon appears at the right of address field.</p>	 <p>The screenshot shows the address bar of Internet Explorer 8. A red box highlights a padlock icon located to the right of the address field, indicating a secure connection.</p>
<p>3. Click on security Pad Lock icon to verify certificate details such as- Issued to, validity, and Certificate Status.</p> <p>The certificate should be issued to <a href="http://www.psbonline.co.in">www.psbonline.co.in</a> and should be valid.</p>	 <p>The screenshot shows the 'Website Identification' dialog box in Internet Explorer 8. The dialog box contains the following text: 'VeriSign has identified this site as: www.psbonline.co.in', 'This connection to the server is encrypted.', and 'Should I trust this site?'. At the bottom of the dialog box, there is a button labeled 'View certificates', which is highlighted by a red box.</p>

## For Mozilla Firefox 10

1. The Website address (URL) should start with **https://** NOT **http://**

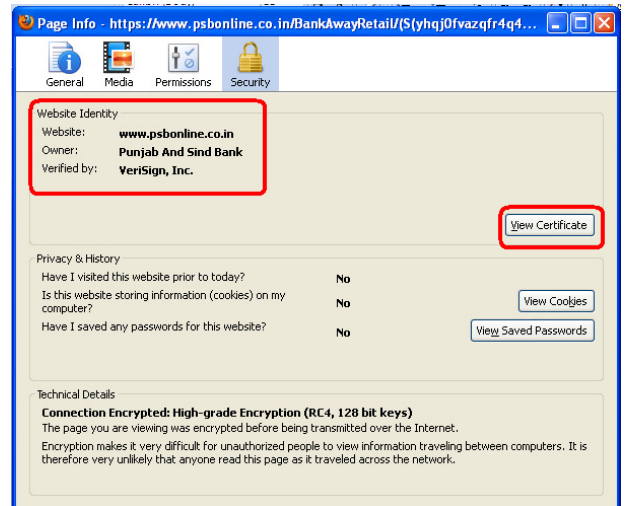

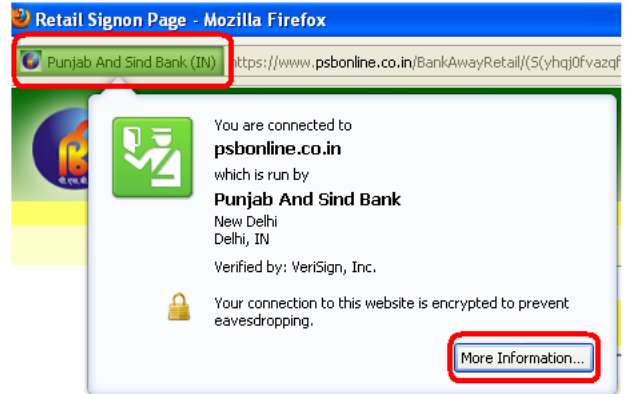

i.e. **https://www.psbonline.co.in/**

The letter 's' in **https://** stands for secure.

2. Click on green tab at the left of address field to verify certificate details such as- Website Identity, Issued To, and Validity.

The certificate should be issued to Punjab And Sind Bank and should be valid.

Certificate Viewer: "www.psbonline.co.in"
